MAR 13 2002

Technology Center 2100

RESPONSE

Sir:

This is in response to the Office Action mailed 1/2/02 (Paper No. 9) in regard to the above-identified patent application. Reconsideration of the rejection of the claims is respectfully solicited in light of the following remarks.

REMARKS

It is respectfully submitted that printed matter can give rise to patentability, see In re Gulack 217 USPQ 401, 403-4. Also, a bar code, data matrix symbol, postage and register values, a bit map, first and second coded symbols, mail class, etc., are structural. Even if they are considered to be functional, such limitations must be given patentable weight, see Wright Medical Technology Inc. v. Osteonics Corp., 43 USPQ 2d 1837, 1840; K-2

CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as on the date shown below as first class mail in an envelope addressed to: Commissioner of Patents, Box Responses, Washington, DC 20231.
